Career Center

Mission

The Career Center offers individualized assistance, programs, and technologically advanced resources to educate students in the development of lifelong career management skills, the attainment of work experience, and the integration of academic and career plans.

Services

Consulting Hours

Stop in to ask quick questions about your job search, resume and cover letters or graduate and professional school applications (see Career Center website for times).

Career Counseling

Request a career counseling appointment to discuss choice of major, career assessment, career related issues, and job search strategies by calling 216-368-4446 or stopping in our office.

Self-Assessment Activities

We offer several assessment tools including the Myers-Briggs Type Indicator, the Strong Interest Inventory and the SkillScan Card Sort. These activities can provide direction as you navigate your choice of major or career interest area.

Credential Files

Establish a credential file to better manage letters of recommendation used for application to graduate schools or for employment.

Interview Practice

To strengthen your interview skills, the Career Center offers the option to have a mock interview. Student must sign-up in advance and provide a resume.

Career Network Program

The Career Network links students with alumni career advisors. Students seeking information, advice and guidance in specific fields can contact alumni and friends of the university in those industries.

Practicum Program

The Practicum Program provides Case undergraduate students from the College of Arts & Sciences and Weatherhead School of Management the opportunity to earn transcript notation for a workplace experience during the academic year.

Case Career Link

The Case Career Center has recently transitioned to Case CareerLink, powered by Symplicity. Current students can use their Case Network I.D. and password to log in.

How to work a Career Fair

The relaxed and friendly "open house" format of a career fair makes it easy to explore career options, develop a network of career contacts, identify job openings, and even land an interview in a short amount of time. Here are quick tips designed to maximize your success.

Preparing for a Career Fair

Clarify your goals. What do you hope to get out of the Career Fair: Information about employers? A chance to meet a representative from a particular company? An overview of the job market? Make sure your expectations are consistent with the purpose of the event.

Research the companies in advance. Review the list of attending employers. Identify those that are looking for candidates with your qualifications. Read any information available about the company in the Career Center's Accenture Resource Library or search the Internet. Write down a few questions about the organization that you can ask the representative. On the day of the career fair, pick up additional material, find a quiet corner, and study it in more detail.

Prepare a one-minute introduction about yourself. In addition to stating your name, school, major, and the type of position you seek, you should express why you are interested in the organization or field. Briefly relate your background to what you know about the employer's needs. Practice your introduction until you feel comfortable with it. This will make you feel and appear more confident, organized, and focused.

Bring your resume. Make sure you have enough copies of your resume—between 20 and 30 is usually sufficient. Be sure to include phone number and e-mail address on resume.

During the Event. Prioritize your time. Take a few minutes before you enter the room to review the list of attending companies. Highlight and prioritize those you are most interested in so you can organize your time efficiently. Instead of standing in line to talk to a particular employer, circulate and come back later.

First impressions are lasting impressions. Dress and act professionally. As always, good grooming is essential. Avoid anything distracting, like too much jewelry, heavy makeup, heavy

perfume or a messy hairstyle. For business occasions, the look should be tailored. Walk confidently with good posture. Make direct eye contact and shake hands firmly.

Market yourself. Consider the career fair as "round one" of a job interview. Show interest and enthusiasm by smiling and speaking clearly. Have a positive greeting: "Hello, I'm Chris Smith. I'm a management major and will graduate in May. I'm glad to see your company here and would like to ask you about....."

Ask appropriate questions. Increase your knowledge of industry trends, job options, career paths, training programs and other information that can help you make a wise career decision. Answer questions clearly and concisely. There may be many people in line behind you, so you don't want to take up too much time. Concise answers also show that you are well prepared. Save your questions on salary and fringe benefits until the company has expressed a clear interest in you. Ask if they are collecting resumes and for a business cards because you will want to follow up on interesting leads. Thank them for their time. Do not just collect give-aways—take information, too.

Broaden your focus. You may miss out on possible opportunities if you pass up an employer because of preconceived ideas. Many technical firms offer non-technical positions, and vice-versa. You'll be surprised how many employers are looking for candidates with a solid liberal arts background, and internship or co-op experience.

Follow Up. Since you have business cards and company information, you can write individualized follow-up letters (include another copy of your resume) to appropriate employers, expressing your continuing interest. If you can, mention something you discussed in your conversation at the job fair.

How do I find company information?

<i>Company Overview</i>	Internet, Annual Reports Directories & Business Databases	<ul style="list-style-type: none"> • Company website • Dun & Bradstreet Million Dollar Directory • Dun & Bradstreet International Businesses • Ward's Business Directory • Hoover's • Business and Company Resource Center • Vault

For more than 25 years, Boston Scientific has advanced the practice of less-invasive medicine by providing a broad and deep portfolio of innovative products, technologies and services across a wide range of medical specialties. These less-invasive medical technologies provide alternatives to major surgery and other medical procedures that are typically traumatic to the body. In less-invasive procedures, devices are usually inserted into the body through natural openings or small incisions and can be guided to most areas of the anatomy to diagnose and treat a wide range of medical problems.

Being a soldier will challenge you from day one. You'll engage life faster and better than most people your age. You'll experience things you never thought possible. You'll learn your capabilities, sharpen your skills, and then push yourself to new limits. What you'll be is stronger, physically and mentally. What you'll feel is a sense of pride you've never felt before.
